Healthy eating is important at every life stage,
with benefits that add up over time, bite by bite. Small changes matter.

Fruits

Focus on whole fruits like fresh, frozen, canned, or dried.

Buy fruits to have them available to add to your meal or eat as a snack. If you buy juice, select 100% fruit juice.

Vegetables

Eat a variety of vegetables and add them to mixed dishes like casseroles, sandwiches, and wraps.

Fresh, frozen, and canned count, too. Look for “reduced sodium” or “no-salt-added” on the label.

Grains

Choose whole-grain versions of common foods such as bread, pasta, and tortillas.

Not sure if it's whole grain? Check the ingredients list for the words “whole” or “whole grain.”

Protein

Eat a variety of protein foods such as beans, soy, seafood, lean meats, poultry, and unsalted nuts and seeds.

Select seafood twice a week. Choose lean cuts of meat and ground beef that is at least 93% lean.

Dairy

Choose low-fat (1%) or fat-free (skim) dairy. Get the same amount of calcium and other nutrients as whole milk, but with less saturated fat and calories.

Lactose intolerant? Try lactose-free milk or a fortified soy beverage.
